

Angel Flight Central Ground Support Team (GST)

To our Angel Flight Central Ground Support Team,

Today's mission had a unique and meaningful twist, as we were able to fly using another Pilatus PC-12 - generously donated for the day by a local businessman. Bill Keen owns a plane similar to ours, and he likes to put his to work for Angel Flight Central now and again. So we decided to use his plane for this mission. The gentleman we flew has been through quite a bit, and the doctors and treatment he is receiving in Colorado are truly life saving for him. Sandy and I have flown him before, and he is still getting treatment for Adenoid Cystic Carcinoma, a rare, slow growing but very persistent head and neck cancer diagnosed in his trachea in 2015. It has spread to his lungs and elsewhere.

We were credited with 2 AFC missions on this trip, landing us at 215 total missions so far.

*Mission Date:
May 19th, 2026.*

Our passenger wrote the following in our guest logbook:

"26 years ago, a tired, worn, frayed old Eagle sought refuge and healing home to Jesus! (At the counsel of my Thrivent rep and my financial advisor, who was significantly older than me, I was encouraged to begin writing a "big dream plan," and everyone I met/go with professionally, spiritually, emotionally, every plane I flew in with Angel Flights from "the old me" to the man that God knew, perhaps took the giant alive, requiring me, but this future self is specifically comfortable and fast. Every year I got up a journal with a new pen & new cancer, because every tattoo I have in memory of "old me" I get my new tattoo in my soul, perhaps replacing me? Then one day, God not only healed the old me, but gave me dreams to fly, and instead of a requirement those untethered dreams, I found a fulfillment and joy. Glory! Every day for the past 365 miles, it's shown I continue to fly the dream untethered! Thank you!!"

Trip Details:

We departed KOJC mid-morning for the quick roundtrip to KAPA in the south Denver area. Weather was clear both ways, and our flight started out DIRECT at FL240, but we were re-routed for the QUAIL arrival into the Denver area.

As usual, we picked up some turbulence as we descended below 10,000ft approaching the terminal area. We chose the FBO on the field that has a restaurant aptly name “Perfect Landing” so we could enjoy a quick lunch before starting the trip back home with our passenger.

As I mentioned earlier, the weather was clear and uneventful for both the outbound and the return trip. Even better, we didn’t seem to find the turbulence on the way out, so our ride home at FL250 was smooth from runway to runway 😊

And here is where you come in. As part of our Ground Support Team, you have offered to provide a contribution to the Angel Flight Central organization each time we fly a mission. To donate to Angel Flight Central online, visit:

<https://angelflightcentral.org/donate/>

Or you can send a check, payable to Angel Flight Central, to:

Angel Flight Central
Charles B. Wheeler Downtown Airport
10 Richards Road
Kansas City, MO 64116

Thank you so much for being a part of our Ground Support Team.

Sincerely,
Joe & Sandy
